# Simply intelligent solutions

## Tralelec GmbH

**Reinbek/Hamburg (rie) Simply intelligent solutions – this is the new slogan of Tralelec GmbH located in Reinbek close to Hamburg/Germany.**

The activities of Tralelec are organized in four business units: Transformers, Electronics, EcoMaxx - energy saving devices and foxfamily - test systems.

Having in focus the continuous development of Tralelec substantial investments have been initiated for the development of new products based on the accumulated know how and the solid financial basis of the SCHORISCH Group. Tralelec belongs to the SCHORISCH group.

One product which came out of r&d is EcoMaxx. With EcoMaxx it is possible to significantly reduce energy consumption of defined illuminants. Tralelec guarantees a reduction of energy consumption of at least 20% without having a substantial decrease of quality of illumination. Additionally the useful economic life of the illuminants will be extended significantly.

Since 2006 Tralelec began to enter the market for test systems. New and innovative test systems are developed and sold worldwide under the brand of the business unit "foxfamily".

The foxfamily actually consists of two product groups: optifox - a test system for optical inspection e.g. mounted pc boards - and pinfox - test systems for in-circuit-testing of pc- boards.

All products of foxfamily test systems are developed following the Tralelec slogan - simply intelligent solutions.

Tralelec - simply intelligent solutions
